

Replication Readme File:

“The Geography of Child Penalties and Gender Norms: A Pseudo-Event Study Approach” by Henrik Kleven

1 Code

All code for this project is provided in the form of R Scripts. The main folder contains an RProject file called “Replication”, which should be opened in RStudio to run all code, preventing the need to redefine file paths for each user. The “Code” folder contains the code used to generate all figures and tables in the paper. The main file to run is “MASTER.R”, which contains all the R scripts used in the project in the order they should be run. The file “setup.R” loads all packages used throughout and defines file paths. The section in the setup file that installs packages should be uncommented and run before starting the project and then commented again later to prevent repeatedly installing packages. Code to clean data is not provided.

2 Data

2.1 Raw Data

The following raw data files are used in the paper and can be downloaded from the linked sources:

- a. [Current Population Survey \(CPS\) Data](#)
- b. [American Community Survey \(ACS\) Data](#)
- c. [National Longitudinal Survey of Youth \(NLSY\) – 1979 Cohort Data](#)
- d. [Panel Study of Income Dynamics \(PSID\) Data](#)
- e. [General Social Survey \(GSS\) Data](#)
- f. [2019 State Population Data from the US Census Bureau](#)

2.2 Cleaned Data

The “Cleaned_Data” folder contains the following files, which are used as inputs in creating the pseudo-panels and all results.

- a. **cps_acs_clean_aged20-50.RData:** Combined cleaned CPS and ACS data for individuals aged 20-50 years. This file is only used for the descriptive statistics provided in Table 1 of the paper.
- b. **acs_clean.RData:** Cleaned ACS data.
- c. **cps_clean.RData:** Cleaned Monthly and March CPS files.
- d. **gss_clean.rds:** Cleaned General Social Survey (GSS) data.

- e. **nlsy79_clean_all.RData:** Cleaned NLSY data, including all childless people as well as parents observed at event times less than or equal to 10. This data file is used to create the PSID/NLSY pseudo-event studies.
- f. **nlsy79_clean_restricted.RData:** Cleaned NLSY data restricted to parents between event times -5 and +10. This data file is used to create the actual PSID/NLSY event studies.
- g. **psid_clean_all.RData:** Cleaned PSID data, including all childless people as well as parents observed at event times less than or equal to 10. This data file is used to create the PSID/NLSY pseudo-event studies.
- h. **psid_clean_restricted.RData:** Cleaned PSID data restricted to parents between event times -5 and +10. This data file is used to create the actual PSID/NLSY event studies.
- i. **popweights_2019.rds:** Cleaned US Census Bureau Population Data for 2019.

2.3 Working Data

The Working_Data folder contains the following files created in the analysis.

- a. **cps_acs_pseudo-panel.rds:** Combined CPS and ACS pseudo-panel dataset.
- b. **psid_nlsy_pseudo-panel.rds:** Combined PSID and NLSY pseudo-panel dataset.
- c. **global_penalties.xlsx:** Dataset of child penalties across countries from Kleven, Landais, and Leite-Mariante (2023).
- d. Datasets with the prefix **coef** contain event study coefficients from the epidemiological analysis of US movers.
- e. Datasets with the prefix **penalties** contain child penalty estimates from different analyses.
- f. Datasets with the prefix **gss** contain variables relating to the analysis of GSS data.
